SUMMARY

Final-year Computer Science student specialising in agentic AI and backend engineering. Recently completed an AI internship building secure multi-agent workflows with LangChain, LangGraph, and FastAPI for an enterprise client, backed by prior experience shipping REST APIs across data pipelines, model integration, and API design. Available part-time immediately; full-time from June 2027.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript
AI / ML: LangChain, LangGraph, Hugging Face Transformers, scikit-learn, FinBERT, LayoutLMv3, OCR
Backend: FastAPI, Flask, SQLAlchemy, REST API design
Data: Pandas, NumPy, feature engineering, data preprocessing, data pipelines
Frontend & Tools: React, HTML/CSS, Git, GitHub, Selenium

EXPERIENCE

AI Intern — Systems Limited Jun 2026 – Aug 2026
Lahore, Pakistan

- Built agentic AI workflows for an enterprise client using LangChain, LangGraph, FastAPI, and SQLAlchemy.
- Implemented security features for AI agents, constraining agent behaviour to safe, reliable, approved actions.
- Designed multi-agent architectures and integrated them with backend services and database layers via FastAPI and SQLAlchemy.

Backend Development Intern — Dr Coders Aug 2025 – Oct 2025

- Designed, built, and maintained RESTful APIs supporting scalable web applications.
- Integrated backend components to streamline data flow and improve system efficiency.
- Collaborated with frontend developers to define API contracts and deliver features to production.

Project Management Associate Intern — Excelerate (Remote) Apr 2025 – May 2025

- Coordinated planning and delivery tracking for a fully remote, cross-functional team across multiple time zones.

PROJECTS

FinAgent Pro — Multi-Agent Financial Document Automation
github.com/HalimaF/FinAgentPro · Python, LangChain, LayoutLMv3, FinBERT, OCR

- Multi-agent pipeline that ingests financial documents, extracts structured fields with LayoutLMv3 and OCR, and flags fraud signals via FinBERT.
- Automated end-to-end financial document workflows, replacing manual field entry and review.

Smart Resume Analyzer — ATS Feedback Web Application
github.com/HalimaF/Resume-Anlyzer-Maker · JavaScript, Python, Flask

- Full-stack app that parses resumes, extracts skills and experience, and scores them against a target job description.
- Generates ATS-style feedback on formatting, keyword coverage, and section structure.

Sales, Inventory & HR Management System
Python, Flask, Pandas, SQL

- Flask dashboard unifying sales forecasting, inventory tracking, and employee records.
- Implemented sales forecasting and HR reporting features over historical transaction data.

EDUCATION

BS Computer Science — Kinnaird College for Women, Lahore 2023 – 2027 (expected)
Relevant coursework: Machine Learning, Data Structures & Algorithms, Database Systems, Operating Systems

LEADERSHIP

Logistics Director, IEEE Women in Engineering · Senior Representative, Computer Science Club · Ambassador, IEEE Xtreme 19.0
